Smart City Report Structure

Introduction

Aim of the report, project background, management approach

Smart City Global Trends

Smart concepts, aims, technology, business models, etc. This chapter is to provide an overview over the Smart City global scene in order to provide a background against which the assessment framework and the analysis can be developed.

Assessment Framework for Pilot City Assessment

Explanation of the framework, categories, ways of applying it to pilot cities

Pilot City Assessment

Standardised assessment of each pilot city / project according to framework, with general introduction to city / project, plus table with assessment findings

Analysis: Emerging trends and open challenges

Based on the assessment, this chapter should seek to derive “lessons learned”, e.g. with respect to feasible business models, introduction of technology platforms, stakeholder integration, etc.

Outlook and Summary

The final chapter could come up with a generic best practice approach to deriving and implementing smart city projects, possibly built on models such as the EU Broadband Guidelines. Chapter also includes suggestions for next steps / activities for EU-China cooperation.
